anyone with knowledge of matter

Facts

Ponce Rogers Nelson, deceased - Approximately April 21, 2016. He had attempted to have children in the late 1990s and sperm last up to 28 years and to date would make Ponce Rogers Nelson's sperm 25 years old from first "catch and save". Other modern methods of Replication of cells, tissues, DNA, RNA can produce children as well. It is evident that his sperm, RNA, DNA, tissues etc... would be very valuable. It is a fact that in the USA and other parts of the world "gifted or special" types of children are produced by stealing or obtaining

without the permission of the deceased
 down about 10 years into the process
 of storing that "genetic cell material"
 are sold, processed and hidden in an
 average pool of host females and a
 gene pool is formed. 10 females are
 on average for that gene pool. motion notice;
 Affidavit in support of motion and Affidavit
 of service by mail dated 8-20-2021 and
 8-23-2021.
