* Pled guilty includes sentenced cases, stay of imposition cases (both of these are considered convictions) and cases where the defendant is given 'probation before conviction' (MN Statute 152.18). Defendants are required to plead guilty but are not considered convicted unless they do not fulfill their probation contract with the court for 'probation before conviction' disposition type.

About 70% Felony cases result in the defendant being found guilty or pleading guilty in recent years, slightly higher than in the past. Dismissals have stayed relatively constant at about 19%. The interim dispositions, such as continued or diverted, have decreased from 15% in 2005 to about 9-10% in the last few years.

* In 2007, when the court moved to MNCIS, the metric for criminal cases moved to: from the decision of the prosecutor to charge (court acceptance or filing of the complaint) to final disposition, so our data reflects this.

The numbers in italics are adjusted averages that are the result of an outlier analysis. Removal of extreme or outlier values presents a truer picture of the average. We present both averages, unadjusted and adjusted for all years.

In September of 2014, the bench began to plan for a combined felony team. One of the first steps was to bring as many judges on board to handle older felony cases (referred to as 'the blitz'). The result was that by the end of the year, we had disposed of 12% more felony cases than the previous year (6,120 compared to 5,458 in 2013). In the first two years of implementation of assignment directly to one of 16 judges for each felony case, we see improvement in the reduced number of days necessary to resolve the case. This will allow for better case management and more rapid resolution of these cases while eliminating non-productive hearings. In 2017, the bench specialized the felony judges into Property/Drug and Serious Felony teams. Timing indicators look even better in 2017 than the previous two years, all while handling more cases. Finally, in 2018, keeping the same model of two felony teams, but adding 2 more judges, Hennepin was able to resolve significantly more felony cases with less hearings. Time to Disposition was slightly up from 135 to 144 days.

* The means in the Homicide rows will fluctuate due to the small number of cases – please use caution in interpreting these numbers. Starting in July 2007 cases are being counted differently; an increase in hearings is most likely related to this difference.

Overall, the length of time between the offense date and the filing date (the decision to prosecute) for felony cases takes a little over 3 months. Some of the quickest prosecution decisions are in the areas of ‘other person’ felonies and weapons cases.

After the filing decision, felony cases take anywhere from 4 months to 8 months on average to reach resolution, with the longest being Homicides and Sex Crimes that also have the highest trial rates. The shortest time to disposition are for drug, property felonies and other felonies. These three categories account for 68% of all felonies.

Figure 1. Time to Disposition for Felony Cases

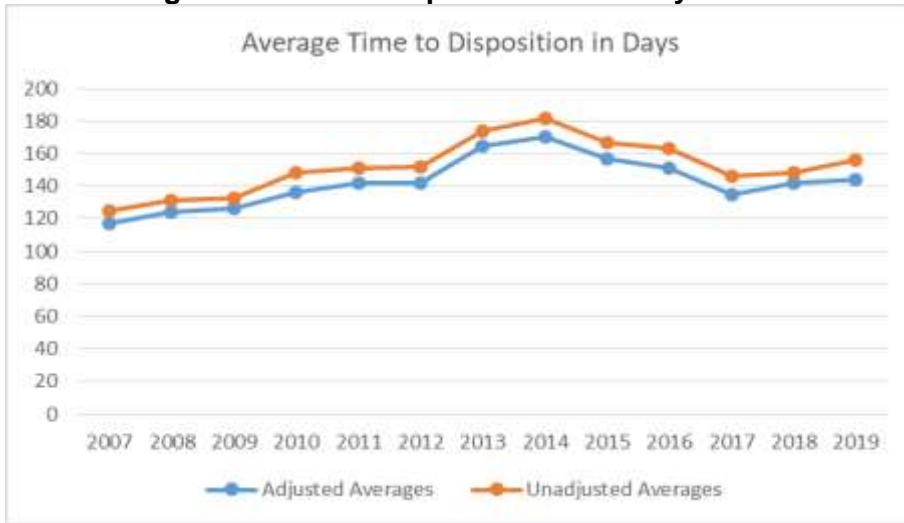

Figure 2. Time to Disposition for Felonies Against Persons

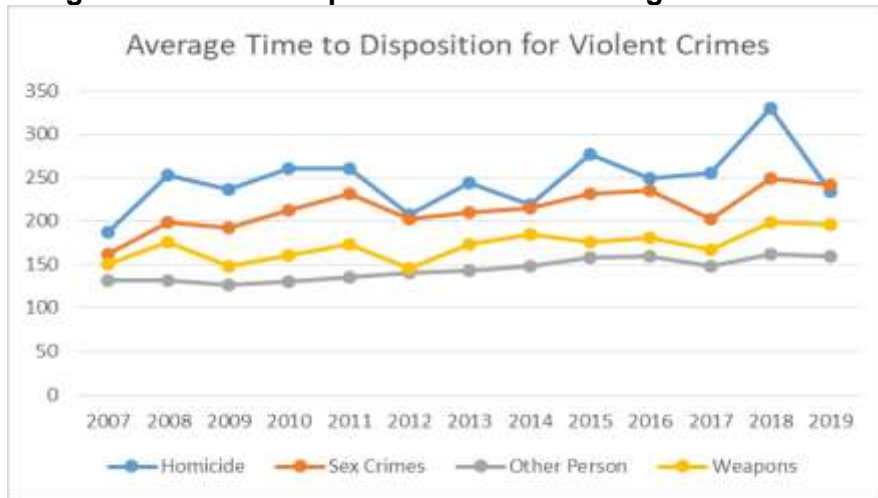

Figure 3. Time to Disposition for Drug, Property and Other Felonies

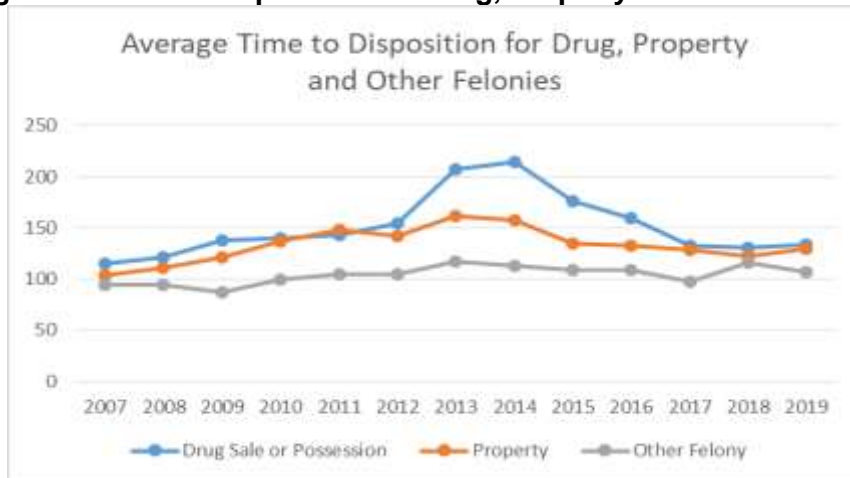

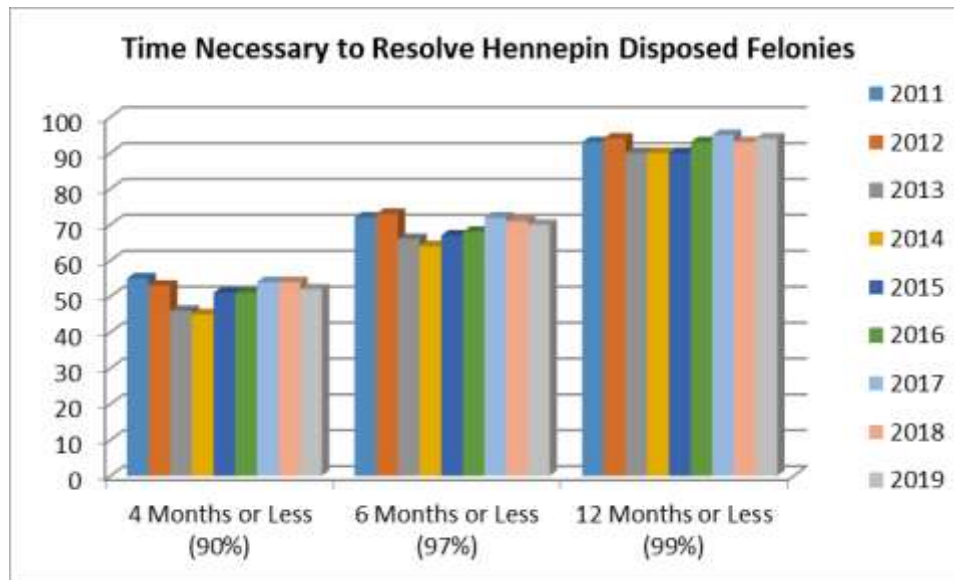

Figure 4. Percentage of Disposed Felonies that meet Statewide Guidelines

A second method of reviewing the length of time to resolve cases compares state guidelines for felony case processing. This graph shows how our felony cases compare to the 90%, 97%, and 99% state recommendation. For this analysis, we removed bench warrant and complaint warrant time to match the state criteria for these recommendations.

The timing elements in 2019 showed an improved time to resolve felony cases at the 99% guideline.

* Adjusted Average removes Outliers

In 2019, the Unadjusted Averages for Non-Felonies:

It took about two weeks from the offense date to the filing date of the case.

Once the case is charged, it is resolved within 4 months on average.

For resolution of non-felony cases, it takes a little over three appearances on average.

*In 2016, conversion of all of the violations bureau cases to the same information system as our criminal court happened. This necessitated a new methodology of separating criminal cases from violations.

In 2019, about 95% of all payable citations close with a guilty plea (citizens paid their fines). Diversions occur in less than 2about 1% of the citations although the Hearing Office does dispose of about 9% of the cases with diversions. Overall, 5% of the payable citations are dismissed. The Hearing Office dismisses about 20% of the cases before them. Eighty-six percent of parking cases are disposed without a hearing.
